

Vignette® V6 Enterprise Adapters for PeopleSoft®

The Vignette V6 Enterprise Adapters for PeopleSoft enable organizations to leverage PeopleSoft information and processes as part of their comprehensive content management lifecycle. Content exchanged with PeopleSoft can be aggregated, produced, personalized, delivered and analyzed across multiple Web initiatives when integrated using the Vignette® V6 Content Suite.

Companies throughout the world rely on PeopleSoft solutions for Customer Relationship Management, Supply Chain Management, Human Resources Management and Enterprise Service Automation. Vignette V6 Enterprise Adapters for PeopleSoft, when implemented with Vignette V6 Content Suite, leverage PeopleSoft investments by making information and processes managed by PeopleSoft applications a unified part of an organization's content management lifecycle. The Vignette V6 Enterprise Adapters for PeopleSoft provide powerful and dynamic Web application development and holistic content management through a graphical interface that simplifies integration, which can speed time to market and enhance online relationships with customers, employees and business partners.

Integrated Content Management Services

Utilizing the Vignette V6 Enterprise Adapters for PeopleSoft in conjunction with Vignette V6 Content Suite provides a comprehensive and holistic solution for content management. PeopleSoft information can be collected, produced, delivered, analyzed and managed as part of a complete content management lifecycle with other enterprise content. Content access can be provided universally through Web sites or portals; common look and feel enables consistent branding; existing business logic and rules can be applied across all Web initiatives; intelligence and taxonomies personalize content and enable usage analysis; and, content from virtually all sources, including PeopleSoft, can be centrally managed. In addition, Vignette solutions support and drive communication through various vehicles including targeted e-mail, wireless, and machine-to-machine exchanges.

Intelligent Adapters

The Vignette V6 Enterprise Adapters for PeopleSoft enable tight integration with existing PeopleSoft systems. The PeopleSoft 8 Component Interface Adapter provides real-time access to information and business logic using the PeopleSoft 8 object-oriented component architecture. The PeopleSoft Query Adapter provides read-access to pre-built PeopleSoft queries at the data access layer using a graphical browser for table and field selection. The PeopleSoft Message Agent Adapter provides bi-directional access to processes and activities enabling interface with virtually any PeopleSoft application. And, the PeopleSoft Connection Adapter provides remote connectivity which enables single login for multiple systems.

<p>Features</p> <p>Integrated Content Management Services</p> <ul style="list-style-type: none"> • Collection – create, aggregate, categorize • Production – manage, target, stage • Delivery – assemble, personalize, observe • Analysis – capture, discover, optimize 	<p>Benefits</p> <p>Enables PeopleSoft information to be holistically managed with other content and Web initiatives. Provides unified and comprehensive management of content throughout the entire content management lifecycle. Streamlines access to information and provide tool to personalize and tailor content based on observed behavior and usage.</p>
<p>Intelligent PeopleSoft Adapters</p> <ul style="list-style-type: none"> • PeopleSoft 8 Component Interface Adapter – real-time access to object-oriented component architecture • Query Adapter – access to pre-built PeopleSoft queries (PeopleSoft 7.5) • Message Agent Adapter – bi-directional messaging for content exchange with any PeopleSoft application (PeopleSoft 7.5) • Connection Adapter – remote and multiple connections with single login (PeopleSoft 7.5) 	<p>Flexible adapters enable access to and exchange of content contained in PeopleSoft applications. Leverage pre-built and existing PeopleSoft components, queries, message agents and security mechanisms and combine with other managed content to provide unified and comprehensive content management. PeopleSoft Adapters support two-way exchange of content for wider exposure and easier access by customers, suppliers, partners and employees. Capitalize on existing systems to help reduce costs, shorten time-to-deployment and increase revenue through more efficient and profitable online interactions.</p>
<p>Graphical Interface</p> <ul style="list-style-type: none"> • Integrated visual workbench • Drag and drop connectivity • Wide selection of integrated connectivity with over 50 adapters 	<p>Graphical user interface with powerful workbench enables business users to easily assemble content for Web applications from a wide assortment of sources with virtually no programming.</p>

Graphical Workbench

The Vignette V6 Enterprise Adapters for PeopleSoft leverage the visual workbench development capabilities of the Vignette V6 Content Suite. Business users can easily access, query, publish and modify information that resides in an existing PeopleSoft system. The intuitive, graphical user interface allows users to visually map content flow and connect disparate information sources by simply dragging and dropping components and connecting attributes. PeopleSoft data can be aggregated with over 50 other content and application logic adapters for fast, flexible content aggregation, transformation and automation.

Enterprise Adapter Advantages

Vignette V6 Enterprise Adapters for PeopleSoft extend the value of existing PeopleSoft investments making it possible to leverage information and data exchanges as part of a unified content management environment. Companies can capitalize on existing systems, reduce costs, shorten time-to-deployment and increase revenue through more efficient and profitable online interactions.
